

CARPET

**Innovative machine
for upholstery cleaning**

CARPET.

**Ideal for upholstery and carpet cleaning.
It is provided with the exclusive foam system
and the high-efficiency suction system**

The dense and stiff foam is applied through a carpet brush or scrubber so that also mechanical action is ensured and the cleaning power of the detergent can be enhanced without soaking the fabric. With suction the product is thoroughly removed so that the fabric is left perfectly dry.

This machine is characterised by compact size so that it can be used also in narrow spaces.

Thanks to its narrow width, it can be used also on buses or between the rows of seats in cinemas or in conference rooms of hotels.

Foam delivery is controlled by a button which is fitted on the brush handle

Accessories: Carpet wands

They are easily interchangeable with the standard accessories (brush and nozzle) and are used for comfortable cleaning of any type of carpeting
